

Index Search – PRINTING BLANK PAGES

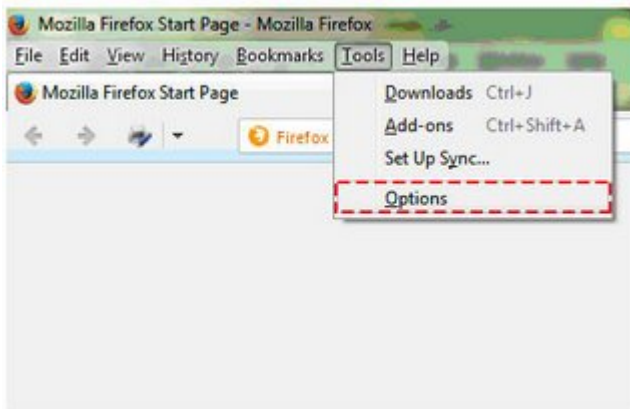

Some browsers work to create their own PDF viewer to use inside the browsers. When using these, the user has issues printing and viewing documents. To correct this, you can go into the settings in the browser and go to the applications tab. From there, you will select Adobe Acrobat as the application to open for the PDF viewer.

For **Firefox**:

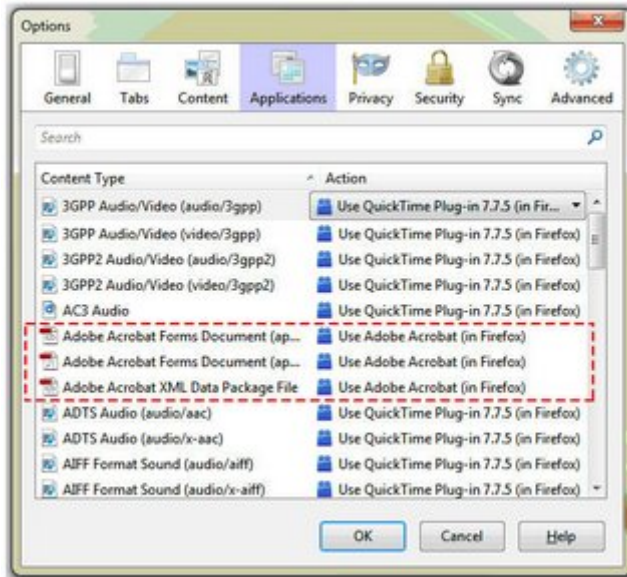

1. See if you have the menu bar at the top of the screen.

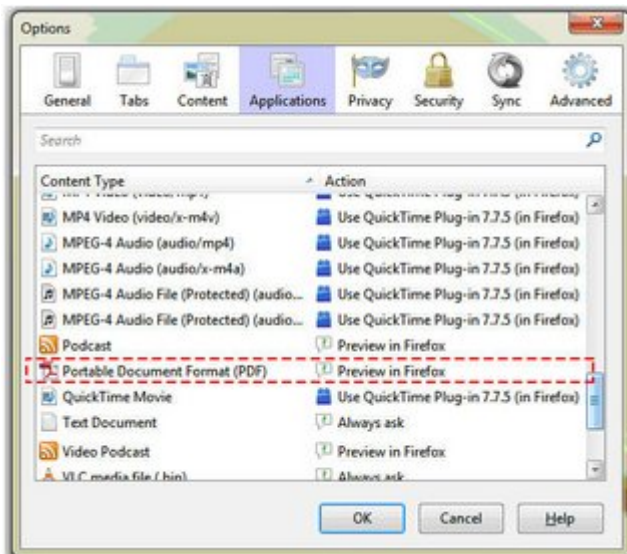

2. Go to Options

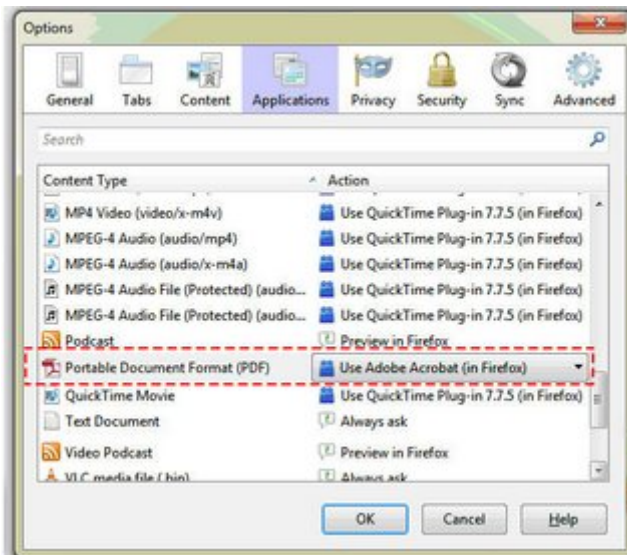

3. Go to Applications.
4. Make sure the first 3 Adobe tems.

5. Go to Portable Document Format (PDF)

6. Change the action from Preview in Firefox to Use Adobe Acrobat (in Firefox)

For **Chrome**

1. In the Chrome address bar, type *chrome://plugins*
2. **Disable** Chrome PDF Viewer.
3. Enable the Adobe Acrobat/ Adobe Reader plugin.
